

Free Monthly Webinar Services Presents:

The Administrators of eDiscovery: The Evolution of Litigation Support in the Law Firm

Tuesday, January 20, 2015 at 2 p.m. (Eastern)

Key points of the presentation:

- Ever increasing volumes of data in electronic discovery require new solutions, workflow and technology
- Data/cybersecurity of client data should be paramount for law firms given the growing threat
- Firm Administration are now very actively involved in making enterprise litigation support solutions given the CapEx and OpEx implications
- Hosted SaaS solutions are trending as the more cost effective, robust and secure solutions for firms large and small

Chris L. Johnson, Senior Vice President of Credence Corp. Chris is responsible for the direction and execution of Credence's business development strategy, which includes developing consultive discovery management solutions for corporations, government agencies and law firms across the country as well as managing the company's strategic partner relationships. He has successfully launched several new markets in the Carolinas, Florida, Alabama and Louisiana for companies in the litigation support services industry to include two companies of his own.

With over 10 years in the litigation support services industry, Chris has held senior management roles in several of the largest litigation support services companies in the industry. He is a Certified Litigation Support Professional and speaks regularly on eDiscovery.

CLM_{SM} CREDIT for live program only:
one hour toward the additional hours required for the initial CLM application for Information Technology, or one hour of Operations Management for recertification.
